

## **Safety Information: Portable Basketball Hoops**

1. Please read the assembly and operating instructions carefully before using the basketball system for the first time.
2. Only use the basketball system on level ground.
3. The basketball system must only be used after it is fully installed on the base.
4. The base must be filled with either water or sand before the basketball system can be used. The exact fill volume is stated in the manual. The basketball system may only be used after the base has been filled. Make sure to check the fill level of the base of the basketball system before each use.
5. Please note that the basketball system must not be used in high winds or bad weather conditions, as it might fall over.
6. Make sure to store the system in an area sheltered from wind to prevent damage or accidents.
7. Do not hang from the hoop or other parts of the basketball system, including the backboard, support struts or the net.

Please note the additional safety information included in the assembly and operating instructions.
